Arrian	25	Buyout	17.00%	14	-	-	3	11
Arrian	26	Real Estate	17.00%	14	Arrian Real Estate	17.00%	8	11

YALE MODEL

Use renowned **Takahashi & Alexander's Yale Model** to forecast cash flow of your private equity funds.

- **Cash Flow Forecasting:** Input budgeted contributions and distributions to visualise cash flow over time.
- **Easy to Use:** Instant calculations based on the fund strategy, expected IRR and project end date.
- **Performance evaluation:** Compare the realised returns of the fund against projected.

STRESS TEST SCENARIO MODEL

- Compute what will be the next 5 years contributions or distributions if the equity market is really good or really bad.
- Aggregate at the portfolio of private equity funds level, in order to see if the investor will need more cash in case of the worst equity market scenario.
- Expected Annualized IRR for the good and the bad stress test scenario.

PORTFOLIO MANAGEMENT

Gain a deeper understanding of your portfolio of private equity funds and ensure that you accounted for the future capital calls and commitments.

- **Aggregation:** Build a portfolio of private equity funds and combine with other multi-asset class portfolios.
- **Accounting:** Aggregate future contributions and distributions to get an accurate view of upcoming payments.
- **Pacing Asset Allocation Model:** Meet target exposure to private equity and plan future commitments.

Asset Name	Strategy	Commitment	Cumulative Contribution	Unfunded	NAV	Annualized IRR	Realization Multiple (DPI)	Cumulative Distribution
Private Equity1	Buyout	10,000,000	10,755,000	1,245,000	11,555,000	16.80%	0.85	9,100,000
Private Equity2	Buyout	19,000,000	15,000,000	4,000,000	15,000,000	1.06%	0.03	400,000
Private Equity3	Buyout	50,000,000	36,000,000	14,000,000	36,000,000	8.85%	0.19	7,000,000
Palladium Equity Par	Buyout	193,000,000	166,181,459	26,818,541	21,689,084	19.80%	0.87	144,492,375
Portfolio		272,000,000	227,936,459	46,063,541	84,244,084	5.23%	0.71	160,992,375
